

Some INGRESS features moving to LOGIN.KINGCOUNTY.GOV

On August 7, 2021, King County will be launching the new LOGIN.KINGCOUNTY.GOV single sign on system. This new system will be used for several of the current systems accessed via the INGRESS distributed security system. INGRESS Registrars (Login Group Owners), will be required to verify the set up of current INGRESS users in the new LOGIN.KINGCOUNTY.GOV system. INGRESS Registrars will be notified directly when the change occurs. For current users of INGRESS, in addition to a new, more modern look and feel, there will be some changes depending on the capability of your organization such as the ability to use your own agency security credentials with federated security.

Please note that not all of INGRESS features will be migrating, AFIS-Alert and PAO Case Information will continue to be accessed via INGRESS. Also, eLODI will now be included with PAO Case Info.

In conjunction to King County's new single sign on solution, the Department of Adult and Juvenile Detention will be migrating eSuperform and LEA JILS to its NEW Jail Management System Portal. Again, the functionality of eSuperform and the LEA JILS systems will essentially remain the same. They will have a more modern look and feel, and a few added features. Please click on the link below to see a brief video overview of the updated features.

The following services are moving to LOGIN.KINGCOUNTY.GOV

E-SUPERFORM
eSuperForm, a component of the Booking and Referral System (BARS), enables law enforcement to enter all information about an arrest and electronically submit to a jail or the prosecuting attorney's office.

JILS
The Jail Inmate Look-up Service is an application for law enforcement officers to inquiry King County's jail management systems for information about past and current jail inmates.

DBIS
The Detention Billing Information System tracks bookings and charges of inmates booked into a King County adult jail facility to determine financial responsibility pursuant to detention service contracts with King County Adult & Juvenile Detention.

SEARCH-WARRANT-RESOURCE-CENTER
The Search Warrant Resource Center provides law enforcement access to search warrant templates, electronic surveillance order templates, contact information for judges and prosecutors, search warrant numbers and other warrant-related resources.

The following services are remaining in INGRESS

AFIS-Alert
AFIS Latent Evidence Request Tracking. A centralized web-based system providing a secure environment for agencies to manage requests for fingerprint processing and examination.

PAO CASE INFO & eLODI
PROSECUTOR by Karpel External Law Enforcement Case Information

eLODI will now be included in PAO Case Info.
